SEND YOUR CV TO :
taha.uenal@refisra.com

Join us in developing an innovative AI-powered kindergarten app designed for Germany, Austria, Switzerland, and England. We are creating tools that revolutionize early childhood education by empowering educators and fostering children's development.

Key Responsibilities
• Collaborate in the development of our cutting-edge app.
• Contribute to building and maintaining a CI/CD pipeline for seamless deployment.
• Implement and integrate AI solutions into the application.

Required Skills
• Kotlin (JVM Ecosystem: Ktor, Exposed ORM)
• Experience with relational databases (PostgreSQL)
• TypeScript expertise (PWA, Vue 3 with Composition API, Vuetify, Vite, Pinia Colada)
• Understanding of REST APIs
• Knowledge of Keycloak (JWT, OAuth)
• Familiarity with Infrastructure-as-Code (opentofu/terraform)
• Proficiency in Material Design principles (Vuetify Documentation)
• Most importantly: The willingness and ability to learn and adapt to our technologies and development stack.

Who We Are Looking For
• English proficiency (excellent communication skills).
• Based in Cyprus or willing to relocate.
• A strong interest in education technology and AI.
• A passion for learning and growing within a dynamic, innovative team.

Your grades don't matter to us – your skills and motivation do!

What We Offer
• The opportunity to work in a growing international startup.
• Hands-on experience with cutting-edge AI technology.
• A chance to contribute to a meaningful project that impacts education.
• Remote-Work.

Please send us:
1. Your CV.
2. Links to your GitHub projects or other portfolio work showcasing your skills.
